

Date: 17th of October 2025**Dear partners, innovators, and changemakers,**

Join us at the outreach event dedicated to shaping the future of electronics. We gather here around a shared mission, one that is as ambitious as it is essential, to eliminate electronic waste and build a circular electronics industry that is resilient, sustainable, and future-proof.

The Circular Circuits project, its partners and stakeholders will share their results and visions driven by a bold vision: to maintain the value and functionality of electronic products and components for as long as possible, while closing material loops at end-of-life.

Agenda

10.00-10.05 Welcome by Arnold Tukker / Jan-Henk Welink / Yulia Fischer
10.05-10.35 Extended producer responsibility and WEEE (Arjen Brouwer, RVO)
