Circular manufacturing in the Province of South- Holland

Pascal van Dam - transition
manager circular manufacturing

Program

- What does the province do?
- Why is circularity import for the province of South-Holland?
- What can we do?
- What do we do?

What does the province do?

- Government layer between the national government and the municipalities

Main tasks include

- Spatial planning and nature
 - Implementing environmental policy and making plans for land use
- Transport and mobility
- Economy and living environment
 - Stimulating regional economic growth

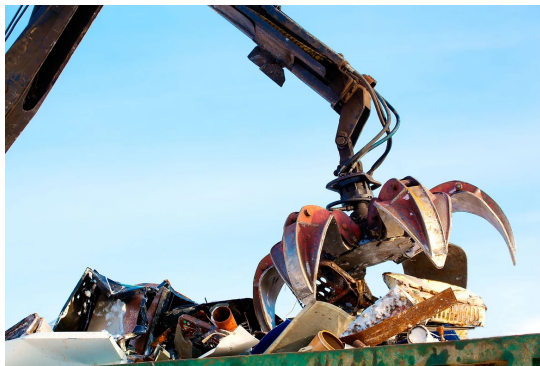

Why is circularity import for the province of South-Holland?

Agreement: 100% Circular in 2050, 50% circular in 2030

Special responsibility: 30% of resources are in South-Holland

Future proof companies: able to comply with new (EU) regulations, policies etc.

What can we do?

- **Coalition & networks**
 - Facilitate (thematic) networks to bring circular actors together
- **Funding & subsidies**
 - Remake existing subsidies to stimulate circularity or make our own
- **Circular innovation**
 - Increasing the knowledge base by doing exploratory studies or by making practical handbooks.
- **Spatial planning**
 - Increasing the importance of circularity in spatial plans
- **Circular organisation**
 - Purchase circular goods in our own estates
- **Permits, supervision and enforcement**
 - Help circular businesses in their quest for permits
- **Policy & Monitoring**
 - Influence (inter)national policy to facilitate circular businesses in the province
- **Inclusive transition**
 - Facilitate better connection between labor market and education sector

What do we do?

▪ Subsidies

- Subsidie Toekomstbestendige Bedrijventerreinen (open): for circular projects on businessparks such as collective waste/resource management or circulair building.
- Circular Business Model Vouchers (open): for advice or implementing a circular businessmodel (such as remanufacturing)
- Digital Product Paspoort-voucher (open): for implementing a digital product passport
- MIT haalbaarheidsprojecten (open in Q1): feasibility studies voor innovative projects
- Circulaire hubs (might open in Q2): for the first steps to create a circular hub (such as elektronica hub) with multiple actors

- **Networks**

- Remanufacturing Collective
- Economic Battery Cluster (startup phase)

- **Spatial planning**

- Handbook for local governments on how to give priority to circular businesses on business parks
