

DATA-DRIVEN INNOVATION
FOR RESPONSIBLE
DIGITAL TECHNOLOGY

VISION

naKnow is an **international federating platform** to build environmental intelligence for the electronics industry

We are a **Swiss-Based Non-Profit Association**

A place for the actors of the electronics industry to **share** their **challenges** & find solutions **together**

NAKNOW

A COLLABORATIVE PLATFORM

Connections

A place to **discuss** the progress made & challenges faced

Challenges

Identifying **common challenges** & complementary initiatives

Solutions

Solving the challenges by **sharing expertise & resources**

NAKNOW'S PROJECTS

Project #1

Creating parametric LCA models: Wafer, HDD, PCB, Screens, Optical sensors

Project #2

Building semiconductors missing LCA datasets (High purity gases, metals...)

Project #3

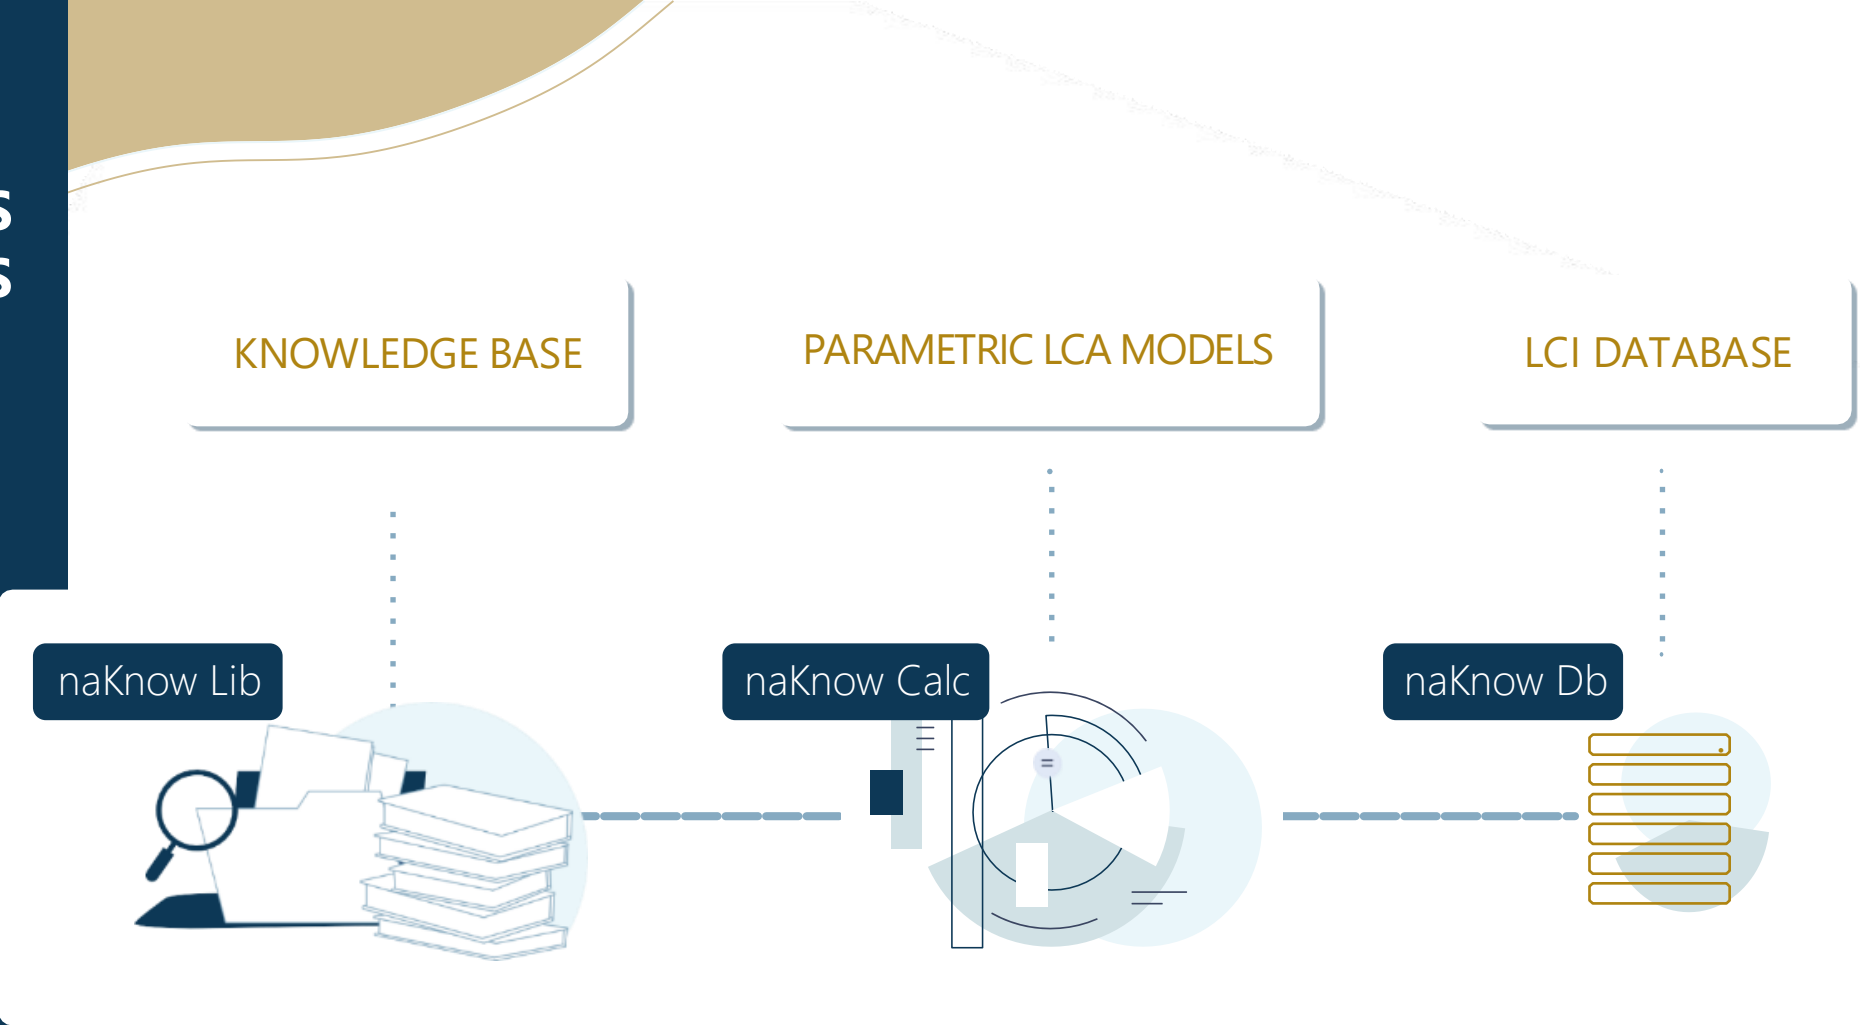

Parametric LCA model of magnetic tape for data storage

Project #4

Circularity of consumers electronics (Horizon Call)

Let's build **together** the next projects or join existing initiatives!

NAKNOW'S ASSETS

Environmental intelligence: from
knowledge to actionable LCA data

WHAT WE CAN BUILD TOGETHER

naKnow invites you to help set the stage for a more sustainable electronic industry.

Participate to naKnow Public Launch **on 04.11 in Paris**

Get involved: connect with other members, share your problematics, find common solutions, join existing projects...

Co-construct **Research projects** starting in 2027

LET'S BUILD THIS TOGETHER!

How can we promote and enable **eco-design** throughout the **digital** value chain:
